## User Management

### Terms and Conditions Management

Administrators can now manage their system terms and conditions and end users will be able to review and access their consent decisions from their profile page.

To see the new options, go to 'Settings' > 'Profile Page Settings'

The screenshot displays the 'Profile Page Settings' configuration panel. At the top, the 'Show terms and conditions' toggle is turned on, indicated by a green checkmark in a circle. Below this, the 'Terms Link' field contains the text 'Our Terms'. The 'Terms and Conditions' section features a rich text editor with a toolbar containing icons for bold, italic, underline, code, numbered list, bulleted list, quote, and indent. The editor content includes a heading 'Terms of Service' and a sub-heading '1. Terms', followed by a paragraph of text: 'By accessing the website at <http://clientportal.com>, you are agreeing to be bound by these terms of service, all applicable laws and regulations, and agree that you are responsible for compliance with any applicable local laws. If you do not agree with any of these terms, you are prohibited from using or accessing this site. The materials contained in this website are protected by applicable copyright and trademark law.'

**i** Shows the terms and conditions on the login and profile pages.

## Configurable Profile Page

Administrators can now control what information is presented on the user profile page.

To see the new options, go to 'Settings' > 'Profile Page Settings'

### Profile Page Settings

Cancel

Save

i

Show profile page to registered users

i

Allows registered users to access their profile page.

Show profile page to SSO users

i

Allows SSO users to access their profile page.

Show user metadata

✕
Whos Who

▼

i

Shows the selected custom user metadata on the profile page.

Show asset alerting options

i

Shows the option to opt-out of assets alerting emails.

## Custom Contact Administrator Form

Administrators can now setup a quick contact form for specified requests. This will allow users to contact their system administrators from their profile page.

To see the new options, go to 'Settings' > 'Profile Page Settings'

Show contact administrator form

i

Shows a contact form on the profile page where end-users can contact the admin via the "admin To" email address as set in Preferences.

## Improved Profile View and Edit Pages

All of the user profile view and edit pages have been updated to our latest UI for better usability. This includes improved layout of information, better accessibility and keyboard shortcuts. Additional key options such as consent decisions and asset alerting preferences are now also available. Furthermore, the underlying technology has been replaced, so that the functionality is entirely driven by our API.

To see the new profile view, go to 'My Profile' from the user menu in the top bar. Select 'Edit' on the page to view the new edit page.

The image displays two side-by-side screenshots of the Brandworkz user interface, illustrating the 'My Profile' view and its corresponding edit page.

**Left Screenshot (Profile View):**

- Header:** Brandworkz logo, navigation tabs (Our Brand, Creative Library, Marketing Toolkit, Showcase, Tasks), user menu (Heri Waters), and search bar.
- Left Sidebar:** Search navigation and a menu with options: Home, Our Brand, Creative Library, Stock Images, Lifestyle Images, Logos, and Products.
- Main Content Area:**
  - My Profile:** Edit button.
  - Personal Details:** Login Name (john doe), First Name (John), Last Name (Doe), Email (john.doe@brandworkz.com), Preferred Language (English).
  - Organisational Details:** Organisational (Brandworkz), Address 1 (Suite 118), Address 2 (22 Highbury Grove), Town or City (London), Postcode (N52EF), Country (United Kingdom), Region (Europe), Department (Marketing), Telephone (+44 (0)20 7288 9700), and a logo.
  - Whos Who: User Details:** Job Title (Head of Digital), Professional Profile (Lorem ipsum dolor sit amet, consectetur adipiscing elit...), and Personal Profile (Lorem ipsum dolor sit amet, consectetur adipiscing elit...).
  - Asset Alerting Emails:** You are currently receiving asset alerting emails from the system. Last Email Sent: 1 Mar 2017 2:00 AM. Opt-out of Emails button.
  - Terms and Conditions:** Terms of Service section with 1. Terms and 2. Use License.
  - Contact Administrator:** Request dropdown, Message input field, and Submit button. Last Submitted: 1 Feb 2017 4:09 PM.

**Right Screenshot (Edit Page):**

- Header:** Similar to the profile view, but with Cancel and Save buttons in the top right.
- Left Sidebar:** Same as the profile view.
- Main Content Area:**
  - My Profile:** Cancel and Save buttons.
  - Personal Details:** Editable fields for Login Name, First Name, Last Name, Email, and Preferred Language.
  - Organisational Details:** Editable fields for Organisation Name, Department, Telephone, Address 1, Address 2, Town or City, Postcode/Zipcode, Country, and Region.
  - User Metadata:** Metaset dropdown, Job Title, Professional Profile, and Personal Profile text areas. Includes a 'Your Picture' section with a 'Select file...' button and a 'Browse' button.
  - Asset Alerting Emails:** Similar to the profile view, but with an 'Opt-out of Emails' button.

**Footer:** Reporting and Settings icons.

## Additional SSO Configuration Options

This will vary from client to client. Please enquire if you require more information on this.

## Image Transcoding

### Faster image transcoding

Generation of thumbnails and transformed downloads significantly speeded up. In some cases 400%

### Better support for transparency

When downloading an image with transparency in (e.g. a PSD product cutout) and you download to a format which supports transparency (e.g. PNG) then the transparency will now get preserved  
When thumbnails are generated for images with transparency, a checkerboard pattern will be placed behind it to show that it's transparent.

### New formats supported for automatic generation of previews

- **Camera RAW formats:** Canon Raw (CR2, CRW), Digital Negative (DNG), Epson Raw (ERF), Fuji Raw (RAF), Hasselblad Raw (3FR), Image Raw (RAW), Kodak Raw (DCR), Mamiya Raw (MEF), Nikon Raw (NEF), Olympus Raw (ORF), Panasonic Raw (RW2), Pentax Raw (PEF), Sigma Raw (X3F), Sony Raw (SR2), Sony Raw (SRF), Sony Raw (ARW), Sony/Minolta Raw (MRW)
- **Fonts:** TrueType (TTF), OpenType (OTF)
- **Photoshop Big** (PSB)

### Ability to pre-generate “canned” downloads

If you have image transform wizards set up where the end-user doesn't have any choice in what they are getting (e.g. a low-res jpg scaled to a fixed size), you can now set these to be pre-generated on upload. The benefit of this is that when the first user comes along and chooses this download option, it will already be there and they don't have to wait several seconds for it to generate.

If you are interested in this please contact us and we can help you configure this.

### Resampling support

We have always had the ability to scale the resolution down to hit a certain number of target width/height pixels.

However, for certain print purposes (e.g. low-res For Placement Only) you may want to set up a transform which preserves the originals size in centimeters/inches, but then resamples it to a specified DPI (e.g. resample down to 72dpi). This is now possible.

## Bug Fixes and Improvements

### DAM

- Direct asset downloads from the selected asset widget
- Faster generation of image previews
- Improved watermarking

### Search

- Improved searching for assets containing special characters
- Improved search filter defaults

### Web-to-Publish

- Artwork deletion
- Ability to add searchable metaset to web-to-publish templates

### API

- Additional user end points
- OAuth2 support
- Endpoint for integrating specific embed sizes
- Additional endpoints for CMS integrations.
- Support for JWT token based authentication
- Improvements to the `simpleSearch` endpoint response, including better descriptors and validation parameters

More information on our API can be found on <https://apidocs.brandworkz.com/>

### Additional improvements

- Additional certificate checks and enforcing of https
- Support for full-width site templates
- Additional support for custom analytics tracking codes
- Various other bug fixes
